

Getting Started with Student-Led Research

Curiosity is a powerful motivator. This session is designed for teachers who would like to get started with inquiry and support student-led research. Participants will learn how to facilitate student-led inquiry to support student understanding across K-12 science. Student-led inquiry by design provides student voice and access to all students to best provide an equitable & excellent learning experience.

Presentation Target:

High School

Presenter(s):

1. Judy Day, Volunteer Director, N.C. Science and Engineering Fair
2. Theresa Gibson, STEM Instructor/Experiential Learning Lead
