AI in the Classroom: An Ethical Dilemma

When it comes to AI in the classroom, do we avoid it or embrace it? Ethically, what is our responsibility as educators? We ultimately can't bury our heads in the sand on this issue. While concerns about students "cheating" with AI should be addressed, conversations that live only in this space are inherently limiting the scope of AI's ability to reshape the classroom. This session will inform participants of some of AI's capabilities and limitations, so teachers can establish baseline best practices and solutions to address concerns and develop consistent AI use standards.

Presentation Target:

 High School

Presenter(s):

1. Matt Barker, English Teacher/STEM Lead Teacher, Davie County High School STEM Center
2. Tani Caudle, English Teacher/STEM Lead Teacher, Davie County High School STEM Center
