The Science House Presents: Shifting to Modeling and the SEPs in Middle School

So you are already doing great science/STEM teaching in your middle school classes, now what? How can we shift to incorporating more Science and Engineering Practices (SEPs)? Join us for a guided self-reflection time where we work on shifting lessons toward SEP implementation. Participants will experience a traditional lesson and then work through a guided reflection process that demonstrates how to identify areas that can be enhanced to become more student-centered and minds-on.

Presentation Target:

Middle School

Presenter(s):

1. Jason Carter, Assistant Director, Mountain Office, The Science House at North Carolina State University (NCSU)
2. Michelle Taylor Benigno, Director, Mountain Office, The Science House at North Carolina State University (NCSU)
3. Marsha Sirkin, Director, Coastal Office, The Science House at North Carolina State University (NCSU)
