Presentation Title: Biotech Blueprint: Launching Next-Gen Biotech Innovators!

Biotechnology is shaping the future, so let's prepare your students!

This hands-on session provides engaging activities that make life sciences accessible and fun for all learners. Discover active classroom investigations that serve as a launching pad for biotechnology concepts. We will use the engineering design loop to develop a time-release medicine. The session offers scaffolded approaches that scale complexity across various grade levels. Get ready to supercharge your STEM program with biotech!

Presentation Target:

Middle School

Presenter(s):

1. Monica Fanjoy, STEM Program Manager, Campbell University
