

HANDS-ON, MINDS-ON INSTRUCTIONAL PRACTICES

Name of Submitter: Christy Hall

Submitter Email: chall@alexander.k12.nc.us

Presentation Title: *Powering Up Engaging Lessons with Pear Deck Integration*

Are your students sitting back and zoning out during your lessons? What if every single student — yes, every one — had a voice in your classroom every single day? Join veteran science educator Christy J. Hall for an energetic, hands-on session that will completely transform the way you think about student engagement.

With 22 years of classroom experience, Christy brings the fun back to learning by showcasing 18 creative ways to integrate Pear Deck into your Google Slides presentations. From social-emotional learning check-ins and brain breaks to embedded videos, pixel art, Quizlet, Edpuzzle and even Nearpod, this session has something for every teacher, every subject and every grade level.

You will not just hear about these tools. You will experience them firsthand, just like your students do.

Whether you are a tech newbie or a seasoned digital educator, you will leave this session with ready-to-use ideas, practical strategies for immediate formative assessment and a renewed excitement for walking back into your classroom. Because when students are involved, students learn — and that is exactly what this session is all about.

Come ready to engage. Come ready to be inspired.

Presentation Target:

High School
