Presentation Title: *The Engineering Place Presents: Collaborative Engineering Activities For Your Classroom*

We focus on strategies to incorporate collaborative, hands-on engineering activities in the classroom. Highlighting opportunities for collaboration in engineering can help address stereotypes about what engineering is and who it is for. Participants engage in a hands-on engineering activity, discuss strategies for use in the classroom and leave with a lesson plan they can translate to their own classroom setting.

Presentation Target:

Elementary School

Presenter(s):

1. Amy Isvik, K-20 Engineering Outreach Program Coordinator, The Engineering Place
2. Steve Johnson, K12 Summer Engineering Camp Program Director, The Engineering Place
